

English Education Student Teaching Final Evaluation

Overview: This *English Education Student Teaching Final Evaluation* Rubric was developed by a Rubric Writing Team made up of faculty representatives across programs (i.e., early childhood, elementary, middle, secondary, K-12 specialties, special education), who regularly supervise students in Field Experience settings. This rubric is to be used over the course of the Early Field Experience and Student Teaching to guide and scaffold the students' efforts and professional development. The *English Education Student Teaching Final Evaluation* Rubric is used by cooperating teachers and university supervisors to rate teacher candidates and student teachers on *English Education Student Teaching Final Evaluation* evaluation categories based upon and tagged with InTASC standards as well as the respective SPA standards when applicable.

Ratings and Basis for Judgement: The rubrics differentiate between four levels of performance – *unsatisfactory, emerging, satisfactory, and proficient*. The performance indicators are based upon criteria and language found in the InTASC Model Core Teaching Standards and Learning Progressions for Teachers 1.0 (2013).¹ This release stipulates that the InTASC standards no longer apply to only “beginning” teachers, but are instead intended as “professional practice standards” (p. 6). Therefore, these standards and the associated learning progressions describe a teacher’s professional development throughout his or her career. We would not expect to see a large number of proficient ratings in early field experience. Rather, we, and our respective accrediting agencies and SPAs, would expect to see development across experiences with students earning more “emerging” ratings in earlier phases and progressing toward “satisfactory” or “proficient” in later phases. Furthermore, these ratings are based upon expectations for student teachers who are still in our programs and not for classroom teachers who have experience. Based upon this assumption, a Satisfactory rating is relatively high and one that most of our student teachers are expected to achieve by the completion of their student teaching. Ratings of Proficient should only be awarded to the few students who can consistently and independently demonstrate exemplary classroom performance per the rubric evaluation categories.

The rating levels *DO NOT translate into A – F grades*. Instead, the rubrics are designed to generate data that will reveal patterns of student performance at various stages of development across the learning progressions. These data are intended to guide continual improvement of our preparation of teachers. All candidates perform differently. However, it is expected that on most indicators, those in *early field experience typically would be rated at the Emerging level and progress to the Satisfactory level by the end of their student teaching experience*. *To reiterate*, ratings of Proficient should only be awarded for exemplary performance.

Validity and Reliability: This instrument was designed by the Rubric Writing Team, formed in Fall of 2014 to develop key assessments to be used across the teacher education programs, as required by our accrediting body, the Council for Accreditation of Educator Preparation (CAEP). This team consists of an interdisciplinary faculty members within the School of Teacher Education and Leadership (STEL) and the Music Department, and three A&P Faculty members in the Dean’s Office. The Rubric Writing Team conducted exercises to establish validity and inter-rater reliability on all the instruments designed during this process. During the 2015-2016 Academic Year, these instruments were piloted. During the 2016-2017 Academic Year, the Lawshe method will be used to establish Content Validity and Internal Consistency Reliability (e.g., Cronbach’s alpha) analyses will be used to determine the reliability coefficient for each instrument. The results of this intended analysis and data will be used to inform revisions and administration of the instruments in the 2017-2018 Academic Year. The validity and reliability processes will be guided by the CAEP Instrument Rubric² and the CAEP Evidence Guide.
